Operation of the remote control

TURN ON

Press the "**Power** ⏻ " key, the unit turns on, the buzzer in the plenum beeps one time and the running mode and the temperature will be displayed.

TURN OFF

Press the **"Power** ⏻**"** key again, unit turns off and the plenum will display nothing.

AUTO mode

Press the "**MODE**" key, select the "△" mode, Fan volume will set automatically, and it is adjustable. Press "FAN" button to get expected volume. Press the up "**TEMP+**" or down "**TEMP-**" key to set desired temperature. Depending upon the difference between the set temperature and the ambient temperature the air-conditioner will automatically decide cooling or heating.

COOL mode

Press the "MODE" key, select the "❄" mode, and Press the down "**TEMP-**" key to set the temperature lower than the room temperature. Press the "**FAN** ❋" key to select different speed and the plenum will display "❄" and the set temperature.

Operation of the remote control (continued)

DEHUMIDIFY mode

Press the "MODE" key, select the "💧" mode, the air volume is un- adjustable to stay at minimum level. Press the down "**TEMP-**" key to set the temperature 1℃ lower than the room temperature, and the plenum will display "❄" and the set temperature.

FAN mode

Press the "MODE" key, select the "✦" mode, Press the "FAN" key. Select Low/Medium/High/AUTO. The plenum will display "✦" and the indoor environment temperature.

HEAT mode

Press the "MODE" key, select the "☀" mode, Press the up "**TEMP+**" key to set the temperature higher than the room temperature. Press the "❋" key to select different speed. And the plenum will display "☀" and the set temperature.

Celsius and Fahrenheit degree change

In any mode, press the "℃/℉" key, you can vary temperature between Celsius and Fahrenheit.

LED turn on and turn off

Press the LED key, the LED light turn on, Press the LED key again, the LED light turn off.

Operation of the remote control (continued)

TIMER ON

Press the "**TIMER ON**" key, the hour digit will flash. Press "**TIME+**" or **"TIME-"** key to set desired time for "**TIMER ON**". Press the "**OK**" key to confirm setup is done.

TIMER OFF

Press the "**TIMER OFF**" key, the hour digit will flash. Press "**TIME+**" or "**TIME-**" key to set desired time for "**TIMER OFF**". Press the "**OK**" key to confirm setup is done.

CLOCK set

Press "CLOCK" button to set the time: keep in pressing "**TIME+**" or "**TIME-**" key to select a desired time

SLEEP

Press the "**SLEEP**" key to display sleep icon on the remote screen, under this function the temperature after 1 hour will automatically increase 1 degree, and after 2 hours it will raise 2 degrees, then it will maintain the same temperature until it automatically turns off 8 hours after setting.

In contrast, in heating mode will automatically reduce 1 degree and reduce 2 degrees after 2 hours, then it will maintain the same temperature until it automatically turns off 8 hours after setting.

Operation instruction

- THE REMOTE CONTROL WILL ONLY OPERATE IF DIRECTLY POINTED AT THE PLENUM. It will beep once when the signal is received. Adjust the distance an d angle if the plenum does not respond.

- The unit will blow cold air in COOL mode and hot air in HEAT mode.

- When the unit is on, press the "DISPLAY" key on the remote control to display on the plenum.

- The air-conditioner features power cut memory and automatic resets after restarting.

- Low temperature heating will cause frosting, during which it is normal to show "DF" on the plenum.

- When the outside temperature is lower than 0 degrees, the heating effect is reduced. Adopt alternative methods of heating.

- If the device is to be left unused for an extended period, remove the batteries from the remote control.
